Passkeys

The future of user login

Passkeys are a new alternative to passwords
that promise heightened security.

Issued by

FusionAuth

Passkeys

Unlike traditional passwords, which can be cumbersome to manage and prone to breaches, passkeys offer a streamlined approach.

Enhanced Security

Phishing-resistant, unique for each application, and encrypted.

Clear User Experience

One-tap access with no password fatigue for users.

Competitive Edge

Improved trust and user satisfaction, lower breach risks.

Compliance Friendly

Adheres to data protection and security standards.

The Impact

For Businesses

Reduced risk, compliance ease, and a standout feature to attract users.
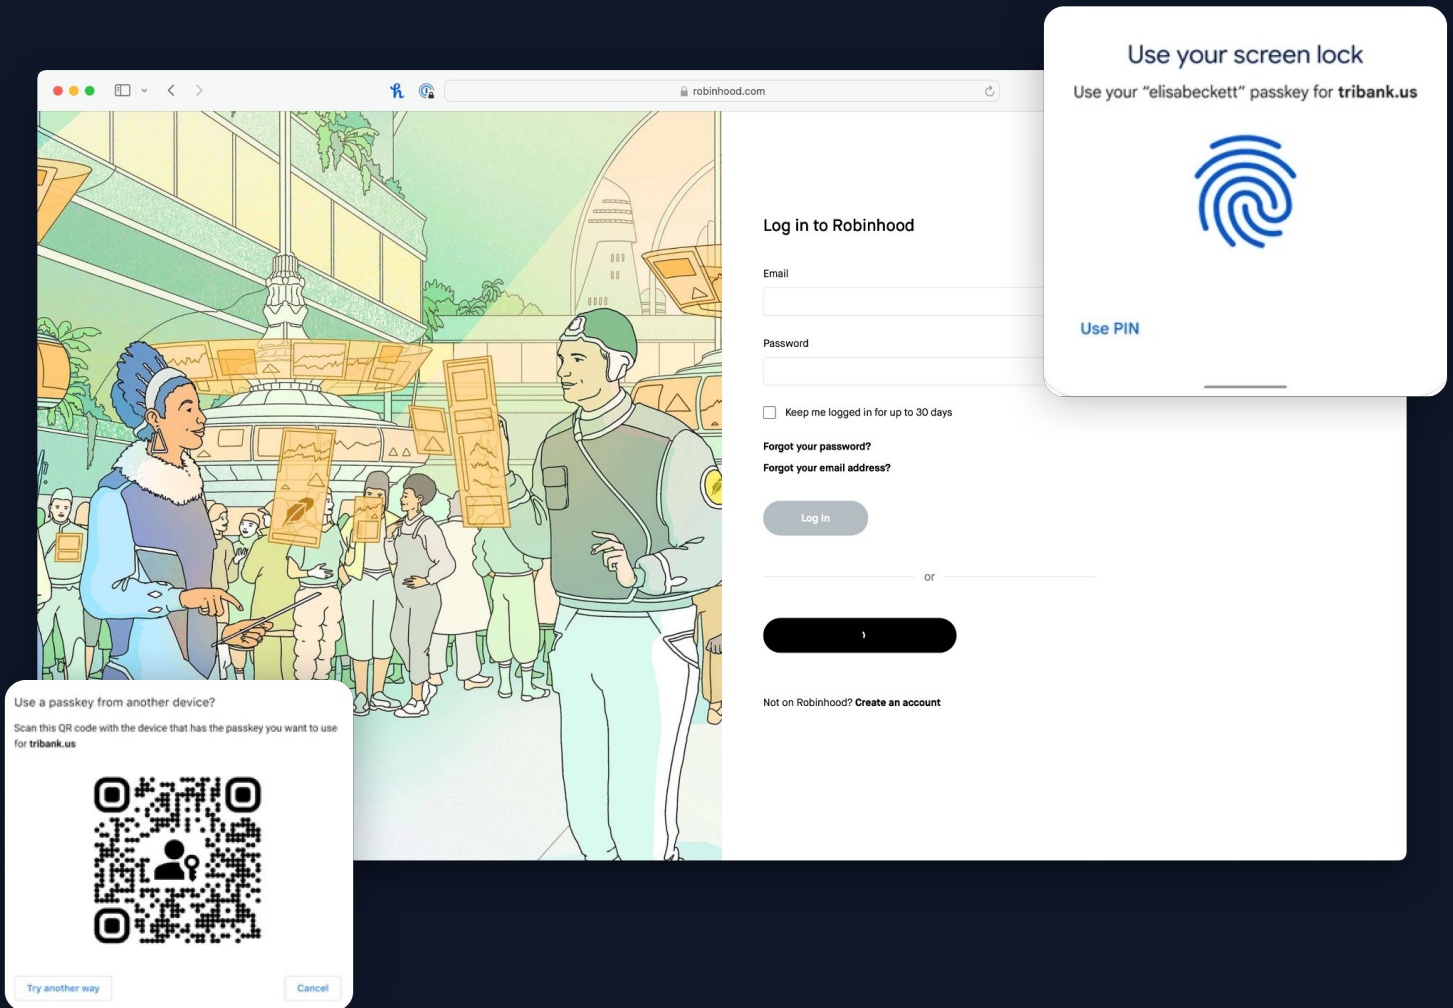

For Users

Streamlined login, higher engagement, and retention.

Adoption in Action

Companies like Robinhood, Best Buy, LinkedIn, and GitHub are leading the way.
